

T.R.A.C.E MANAGEMENT SYSTEM

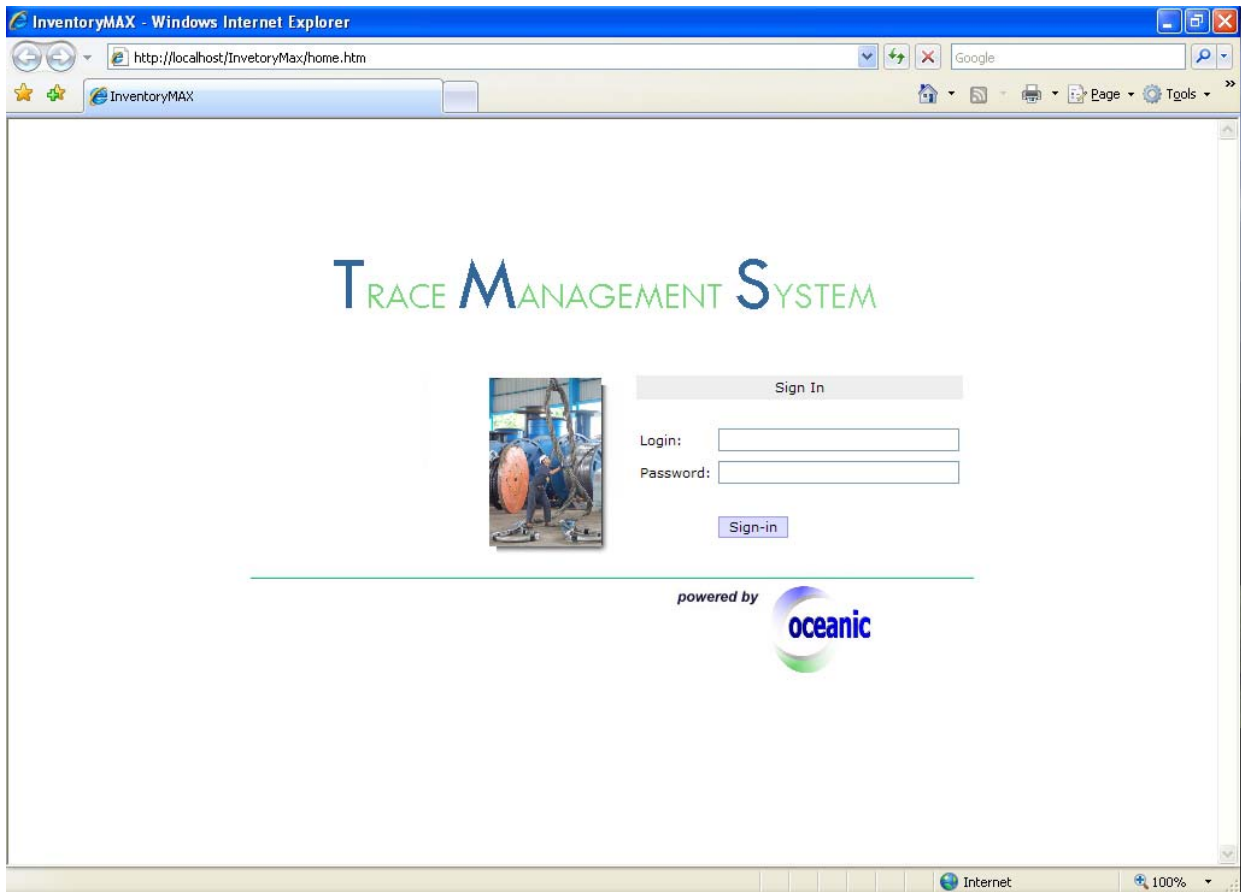

Traceability, Reporting, Application, Conditioning, Engineering

An enhanced equipment management software, catering to the needs for our esteem clients, for the sole purpose of providing total solution in keeping track of their existing lifting equipment and its relevant data.

T.R.A.C.E was designed by our very own technical specialists who actually worked with lifting equipment and understand the basic requirements and international standards stipulation for the safe usage of such equipment.

T.R.A.C.E has recently been upgraded to web based, thus allowing our clients 24/7, round the clock access to data anywhere in the world as long as an internet connection is available. Maintenance can also be done remotely by our IT support team, ensuring quick response and minimizing any down time should the unforeseen happens.

Welcome to T.R.A.C.E

We designed T.R.A.C.E based on the following fundamentals.

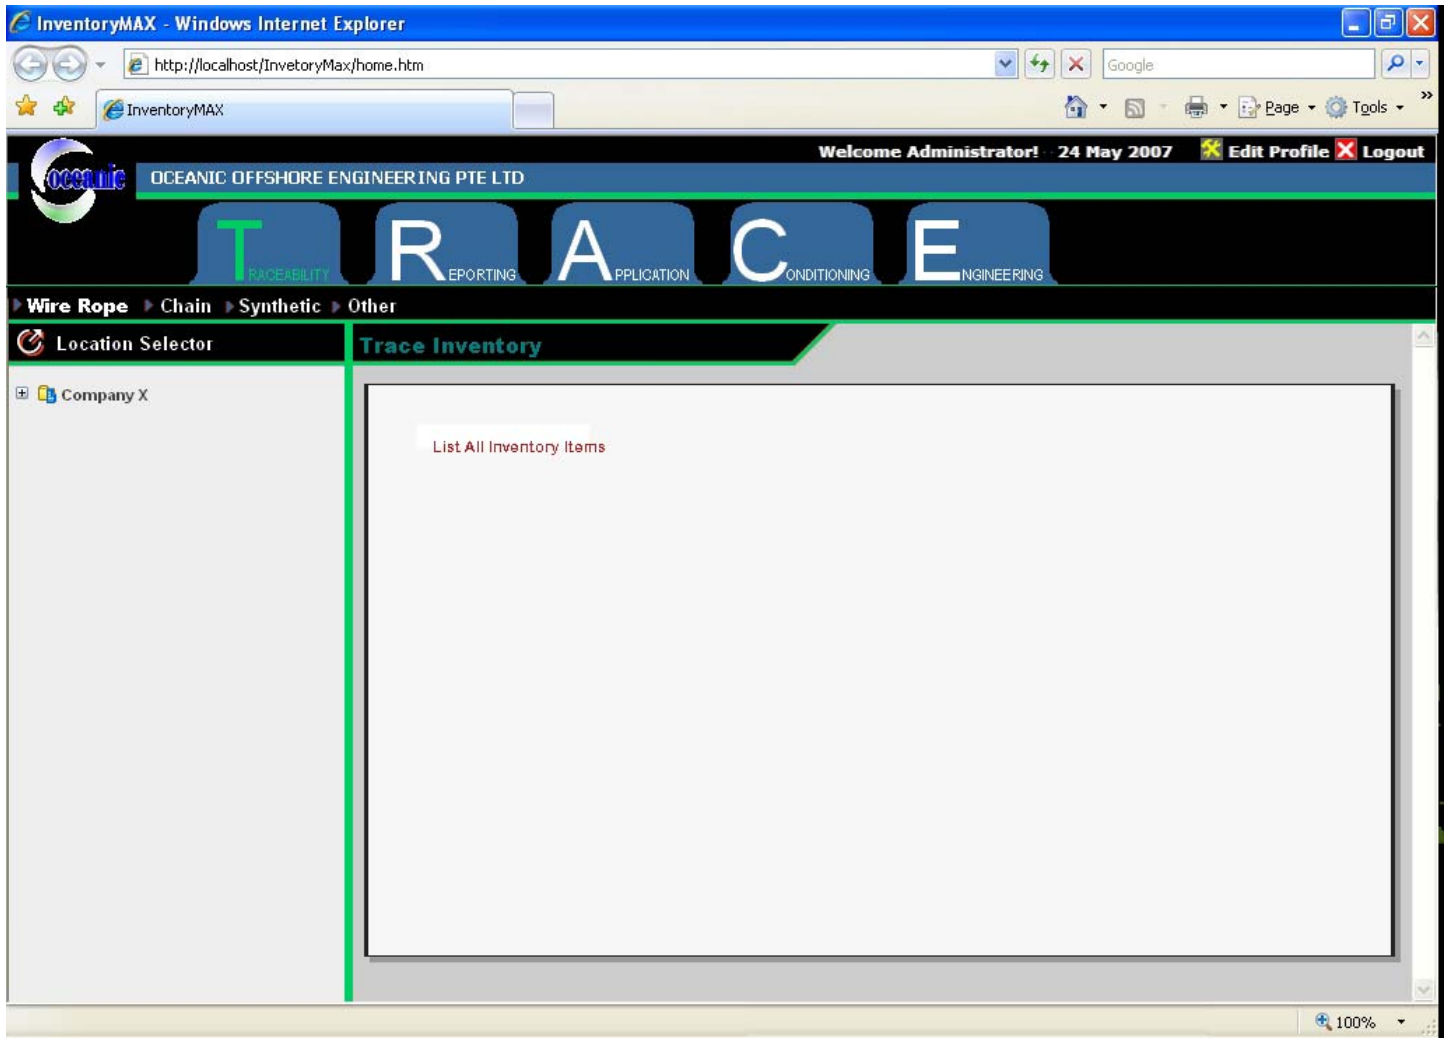

- T** Traceability : To keep track of equipment in stock or availability
- R** Reporting : To consolidate all Mills, Test, 3rd Party certificates, pictures, attachments.... etc
- A** Application : To group items based on usage capabilities, eg. Tons, length, duration of certifications... etc
- C** Conditioning : To provide detailed list of schedule of maintenance, servicing, repairs,etc
- E** Engineering : Data base for engineered items, tracking part numbers, dates, certificates.... etc

“We designed a software to assist our clients not confuse them”Nicholas Lim (MD)

An example of what T.R.A.C.E does.....

Click on “T” after log in page.

Choice of lifting equipment will be displayed on the next row.

A selection of Wire rope(wire rope slings), Chain (chain slings), Synthetic (PP rope), Other (chain blocks, lever blocks, clamps, shackles.... etc)

Simply select the equipment data needed.

T.R.A.C.E also prompts the user the location these items can be found.

Click on “Wire Rope” tab

The screenshot shows the InventoryMAX web application interface. The browser window title is "InventoryMAX - Windows Internet Explorer" and the address bar shows "http://localhost/InventoryMax/home.htm". The application header includes the Oceanic logo, the company name "OCEANIC OFFSHORE ENGINEERING PTE LTD", and a welcome message for the Administrator dated 24 May 2007. The main navigation bar features the word "TRACE" in large letters, with sub-labels: T (TRACEABILITY), R (REPORTING), A (APPLICATION), C (CONDITIONING), and E (ENGINEERING). The "Wire Rope" tab is selected, showing a breadcrumb trail: "Wire Rope > Chain > Synthetic > Other". The "Location Selector" on the left shows a tree view with "Company X" expanded to "Stores at Location X", which includes "Store 1" and "Store 2". The "Trace Inventory" section shows a search for "Results" with a "Print" button. A table displays 3 items:

S/N	Distinctive No.	Description	SWL	Last Test	Test Due	Certs			Supplier
						Mill	InH	ABS	
1	ST 1099	38mm x 6 MTR (6x36) IWRX GHCVD c/w 2 Ends Soft Eyes	18T	05/2007	05/2007				-
2	ST 0099	4 legged Wire rope slim	23T	04/1007	04/2000	-		-	-
3	ST 0199	42mm x 6 MTR (6x36) IWRX GHCVD c/w 2 Ends Soft Eyes	10T	02/2007	03/2007		-		-

All items relating to wire rope will be displayed.

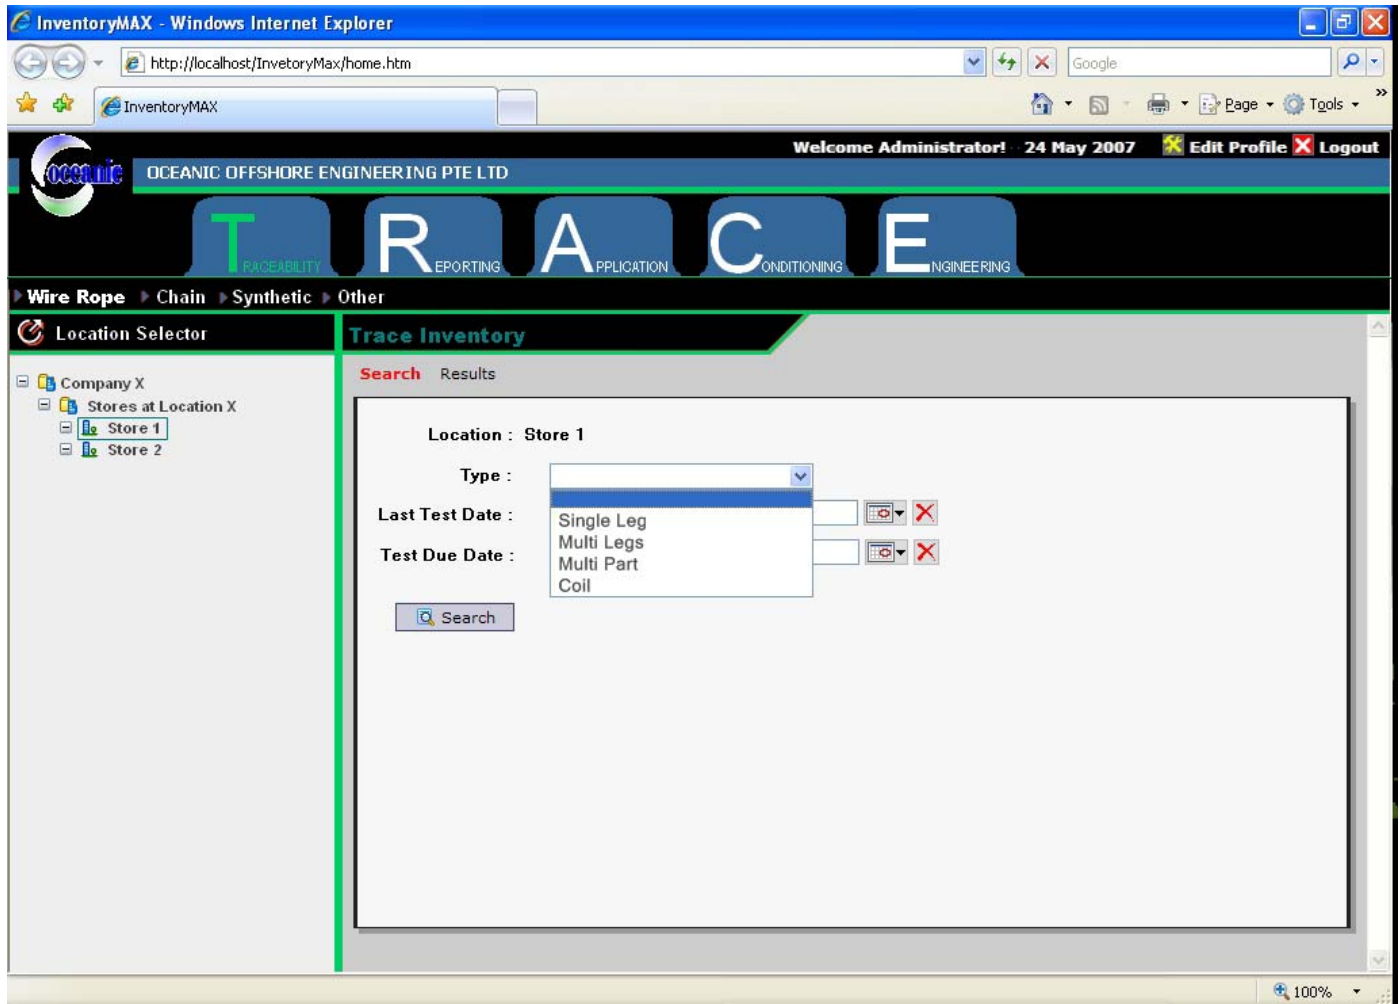

Distinctive numbers, description, SWL, last test date, test date due (set by user... 6mths, 1yr, 1.5yrs...etc), mills certificates, in house test certificates, 3rd party certificates (such as ABS).

Controlled by location/vessel storage or use.

Easy editing, just follow the prompts on screen.

Equipped with a powerful search engine.

Find a sling either by its distinctive number, description, swl, diameter,....etc

All the user needs to do is to follow the prompts.

“You don’t need to be IT savvy to make this work”.....Denis Koh(Ops Dir)

We trust the T.R.A.C.E software will be able to meet your requirements. Feel free to contact us for more details.

Thank you.
